

UNIT 11 QUIZ: GRADE 6 ACCELERATED HONORS STUDY GUIDE

- 1. Large ocean currents are caused by gravitational energy.**
- 2. Know the effects uneven heating of land and water has on winds and air.**
- 3. Know the effects uneven heating of land and water has on winds and air.**
- 4. Know the effects uneven heating of land and water has on winds and air.**
- 5. Know the effects the density of air has on winds and air.**
- 6. Know the differences between radiation, conduction and convection.**
- 7. Know the differences between radiation, conduction and convection.**
- 8. Know the differences between radiation, conduction and convection.**
- 9. Know the effects the density of air has on winds and air.**
- 10. Know the effects the density of water has on water currents.**
- 11. Know the differences between radiation, conduction and convection.**
- 12. Understand the basics of electromagnetic waves.**
